

Community Energy Conference 2020: Exhibiting & Sponsorship

Community Energy South & Community Energy England are coming together on the 30th April in Lewes Town Hall, East Sussex, to hold the sector spring conference. The region around Lewes boasts one of the highest concentration of community energy projects in the country.

The conference theme is the role that Community Energy can play in tackling climate change and the race to net zero.

We will showcase best practice projects and innovation using this platform as a springboard for the 2020s.

Community Energy organisations have a combined membership of 48,000.

We anticipate attendance of up to 300 delegates from across the South East, consisting of :

- Established community energy groups
- Newly established community energy groups
- Local authority representatives - councillors & sustainability officers
- Project installers
- Project developers
- Technology providers
- Supply chain & service providers

CEE & CES Spring Conference 2020: Exhibiting & Sponsorship

Why Community Energy?:

Community Energy is growing it's contribution to our energy system across the heat and power sectors and accesses consumer engagement for EV charging and DNO flexibility trials.

93% of councils in the South East have declared a climate emergency

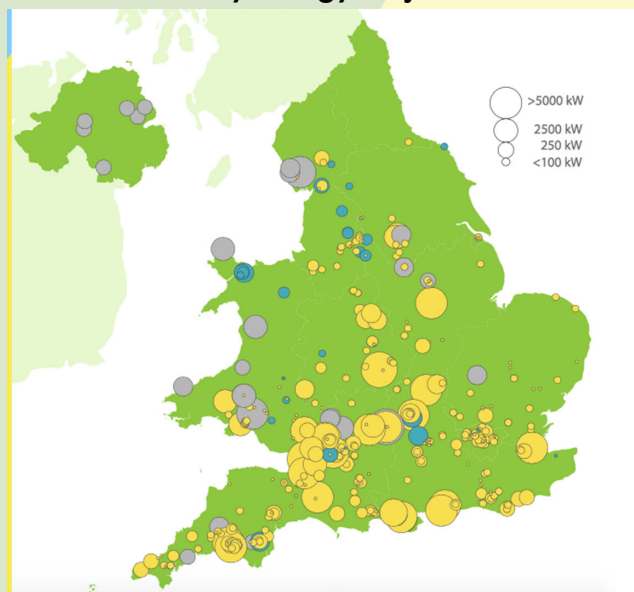

Local Enterprise Partnerships have been mandated by BEIS to produce local energy strategies.

The Greater South East Energy Hub supports business, local authorities and communities to deliver a new wave of local energy projects.

The revamped Rural Community Energy Fund (RCEF) will reopen shortly ensuring funding for Community Energy partnered feasibility studies.

These initiatives put Community Energy into a strong position to help drive the race to net zero and support local authorities in building resilient communities

Why Participate in this event?

Community Energy invests in the community providing locally owned renewably sourced electricity, grid flexibility, & is set to engage with local authorities to tackle climate change initiatives.

CE groups are part of their community and bring innovation, creativity and flexibility to solve local problems AND create a low carbon future. CE pioneers are dedicated, committed and often have had successful careers across many spectra of society prior to engaging with CE.

Get your business seen in front of committed active community energy leaders and groups. Some innovations arising from CE:

- Riding Sunbeams: Injecting solar into our National Rail network opening up new markets with DFT and Innovate UK funding
- Locally owned solar farms
- Solar schools including science education programmes within schools and special monitoring screens for children to see how their school is generating and using solar
