

We are often asked about local installers – here are some of the companies that we know and or have worked with.

- [EcoHiSolar](#) - domestic solar PV, thermal & heat pumps.
- [DH Solar](#) – solar thermal (not solar PV, but work with the above).
- [Solar UK](#) – domestic solar been in business for a long time.
- [Solar Sussex](#) – not used them but they have come up as a SE installer a number of times.
- [Ecosphere](#) – PV & heat pumps believe BHESCO use them.
- [The Greener Alternative](#) – Don't do PV, but worth noting.
- [Basingstoke Energy Coop](#) – worked with Riding Sunbeams (a CES project).
- [SAS](#) – more commercial.
- [NWT](#) – similar to SAS more commercial than domestic.
- [Joju](#) – been in the solar business for a long time & have worked as a LA installer

Probably best performing solar PV panels are [SunPower](#) (not cheap, but perform well).
