

List of local Installers

These are some installers who operate in our local area; the South East of England. By providing this list run by Ovesco CIC, does not endorse their services and you should carry out your own enquiries. We would encourage you to obtain at least two quotes when planning any installation and ask for two references, perhaps even ask to visit an installation. We understand that the installers have the relevant qualifications needed for the works they propose but please undertake your own checks on this point too.

If you have any questions, please call us on **01273 472405**
